

# University Hall Route (AD)

The **AD/ES** skywalk (highlighted in a yellow box) is a high strike area. It is considered part of AD. It has a north face and south face. If a bird is found directly beneath the skywalk, indicate that in the notes.

There are areas of dense low shrubberies around AD: do not worry about looking underneath the plants when they are fully leafed out.

Pay close attention to the AD/ES skywalk area – it is a collision hotspot.
