

# Impacts of Climate Change Notes

Claim: Humans are causing Global Climate Change.

Evidence: What are the graphs telling you?

Reasoning:

## Ways humans are affecting climate change

- Burning fossil fuels

- 

- 

- 

- Meat consumption

- 

- 

- 

- 

- Agriculture

- 

- 

- 

- 

- Land use Change

- 

- 

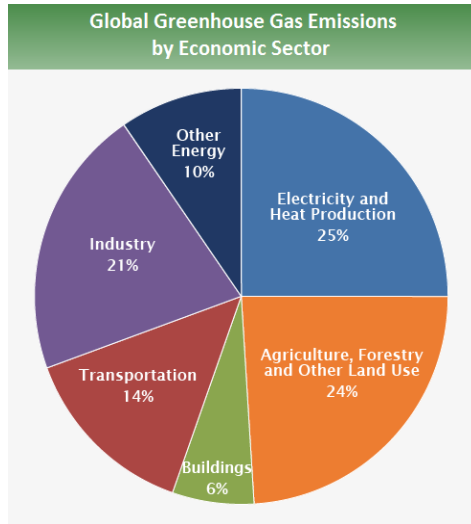

- 

- Landfills

- 

- 

What else can you think of?

## How Climate Change affects humans

- Rise in sea level

- 

- 

- Increased health issues

- 

- 

- 

- Wildfires

- 

- 

- 

- Decreased crop yield (i.e. hunger)

- 

- 

- 

- More severe storms

- 

- 

- Collapse of Food Webs

- 

- Infrastructure Change

- 

- What else can you think of?
